SEMESAN JR. By all means treat your field corn. Semesan Jr. possesses properties that benefits both good and diseased seed. Is a preservative against rotting in cold, wet weather; checks seedling blight; increases germination; invigorates growth; develops sturdier growth and promotes earlier maturity; in addition to which it improves the quality and increases the yeild.

Chemicals for Treating Seed

NEW IMPROVED SEMESAN BEL FOR SEED POTATOES

1 lb. to $7\frac{1}{2}$ gal. Water treats 60 to 80 bushel. Just immerse thoroughly and take potatoes out.
4 oz... 50c 1 Lb... \$1.65 5 Lbs... \$7.00 25 Lbs... \$31.25

BLUE VITRIOL

5 Lbs.... 60c; 10 Lbs.... \$ 1.00; 25 Lbs.... \$2.25

FORMALDEHYDE

FOR MILLETS, SORGHUMS, SEED POTATOES

Hot treatment—temperature 120 to 125 degrees. 1 pint to 30 gallons of water treats 30 to 50 bushels. Treatment 3 minute immersion. 1 Lb... \$.40; 6 Lbs... \$1.80

CORROSIVE SUBLIMATE

(Bichloride of Mercury)

FOR SEED POTATOES AND VEGETABLE PLANTS

A deadly poison. 4 oz. to 30 gallons of water treats 8 to 12 bushel. Immerse for $1\frac{1}{4}$ to 2 hours.
 $\frac{1}{4}$ Lb... 75c 1 Lb... \$2.75

COPPERCARB—(18% to 20% Copper)

Smut Spores in Wheat are easily killed.

5-lb. Cartons (6s)..... Each 90c

COPPER CARBONATE—(50% plus Copper)

Two and one-half times as strong as Coppercarb.

5-lb. Bags (6s)..... Each \$ 1.50

SEED TREATMENT

SMUT IN BARLEY: For Stripe and Covered Smut add 1 pint Formaldehyde to 30 gallons water (Not Heated). Soak seed for three hours.

For **COVERED SMUT** on **HULLESS BARLEY**, dust with Copper Carbonate, 2 to 4 oz. to bushel of grain.

SMUT IN OATS: For Loose Smut and Covered Smut add 1 pint Formaldehyde to forty (40) gallons of water and sprinkle on 40 bushel grain. Cover with sacks or canvas for two to four hours.

BUNT or STINKING SMUT IN WHEAT: Dust seed grain with Copper Carbonate, 2 to 4 ounces to the bushel, or Copper Carb, using 4 to 6 oz. per bushel. Mix in a barrel mixer so that all grains are covered with the dust. Treatment can be made at any time and grain can be stored without injury.

For **CONTROL** of **KERNEL SMUT** in **SORGHUMS**, add 1 pint of Formaldehyde to 30 gallons of water. Soak seed 1 hour and dry, or dust with Copper Carbonate, 2 to 4 ozs. to bushel.

For **CONTROL** of **SMUT** in **MILLET**, soak the seed 2 hours in Formaldehyde, 1 pint to 45 gallons of water. Copper Carbonate also effective.

SEED TREATING CHEMICALS priced on Page 71 of Catalog

PLANT A GARDEN

Why Not Grow What You Eat?

A good garden can be maintained on a very small space and with fewer acres being tilled more time can be devoted to better gardens. They will help towards reducing expenses. (See Pages 2 to 33 of Catalog.)

Over 30 pages, finely illustrated, of every vegetable that is fully adapted to this country. **QUALITY** is paramount. **GOLD SEAL** means the Standard of Excellence. You can Buy and Plant **GOLD SEAL** Seeds with Confidence. Send for our 1936 Catalog. IT'S FREE.

PLANT TREES

Windbreaks and woodlots are great benefits and conveniences and small orchards of assorted fruit are of untold help. (See Pages 54, 55 and 56 of Catalog.)

Hand in hand with beautiful lawns go shrubbery, trees, bulbs, plants and vines. Be your place large or small, landscaping is essential toward beautifying your surroundings. Our stock is complete with only First Grade items that are particularly adapted for this country. A wide variety is open for your selection and a careful perusal of Pages 47 to 59 of our Catalog will prove worth your while.

INCREASE and MAINTAIN FERTILITY

Plant leguminous crops—Clover, Alfalfa, Peas. Yellow Sweet Clover is a good soilage crop and makes good pasture and hay. (See Pages 61 to 68 of Catalog.)

MAKE PERMANENT PASTURES

There are many grasses that can be used for permanent pastures for dry and irrigated sections. Adequate pastures reduce the carrying costs of milk cows and idle stock. (See Pages 60 to 69 of Catalog.)

FIGHT WEEDS

Frequent cultivation will aid in eliminating weeds. Cultivating tends to increase and maintain soil moisture. Weed plants, turned under before they mature seeds, add some humus. Weeds are destroyed by weed-killing compounds such as ATLACIDE CALCIUM CHLORATE.

See Catalog Page 70. Ask For Prices on Larger Quantities.

SEED POTATOES

When ready for them, write and tell us the quantity you will need and the variety you intend using and we will be glad to quote you promptly.
